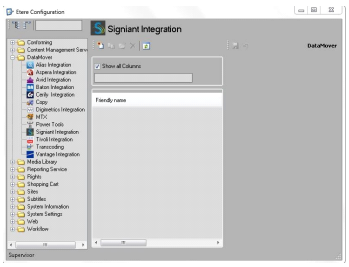
EA1543 Signiant Integration

Etere is able to integrate with Signiant to trigger jobs and get progress and status updates.



(Signiant Integration)

Etere supports Signiant, a software solution that provides WAN optimization for transferring files over large geographical distances (e.g. for publishing video on demand) including a variety of workflow tools to aid in file delivery.

In Signiant, transfers are managed as job instances based on workflow templates (which are organized in job groups). In Signiant, transfers are managed as job instances based on workflow templates (which are organized in job groups). Etere provides the capability of creating custom "Signiant integration" actions to request -via workflow- the execution of file transfers based on Signiant jobs for media files stored on Etere metadevices.

License:

Signiant Integration requires the ET1543 license which has capability to request the execution of file transfers based on Signiant jobs for media files stored on Etere metadevices.
