(Reports on etereweb)

Etere launched a business control automation tool, **Etere Shopping Cart**, that empowers you to manage your media operations from a web interface. Integrated with Etere database, shopping cart allows you to plan your resources, distribute and assign tasks effectively.

With Etere Shopping Cart, you can configure service requests for workflow tasks, assign resources and essentially place an "order" for what needs to be done. With a simple log in, you can manage your operations on any internet browser. Etere Shopping Cart gives you full visibility and control of your media operations including resource configuration and data mover workflows. It is easy to drive your workflows even while on the move!

Additionally, it is integrated with the **Reports** feature on EtereWeb to give you business intelligence insights that will help you to make strategic decisions to drive your business forward. Designed with a user-friendly interface, Etere Shopping Cart provides automation control that enhances accuracy through real-time updates and seamless integration with your system.

Designed to simplify complex processes, the shopping cart also allow you to manage batch requests and recurring bookings. Once a ticket has been submitted, it is automatically assigned a ticket number which you can use to track its progress.

## Key Features

- ◆ Reduces operating costs and eliminates manual tasks
- ◆ Book resources and receive real-time updates
- ◆ Centralised control of your business operations
- ◆ Web interface allows you to manage your operations while on the move
